BICOM

Bicom srl, market leader in automatic distribution for hot meals, designs, builds and sells its innovative vending machines all over the world.

Bicom is leading the way in automatic catering out of home.

The delivered food is precooked and can be kept frozen or at ambient temperature.

Bicom has developed a network of selected dealers thanks to which is promoting a new way to eat.

VENDING MACHINES

The **vending machines** produced by Bicom are very easy to handle, simple to use and able to suit various kind of food with different packaging, shape and size.

Conservation is safe and the maintenance temperature can be monitored continuously and even remotely.

Thanks to the powerful, fully integrated, microwave, the heating of the product is fast, uniform and exploits at best the qualities of food.

Due to internet connection and the **Bicom Cloud**, the vending machines are under control all the time via smartphone, tablet or PC.

Our vending machines:

- are easy to handle and pleasant to use;
- ensure safe storage;
- ensure safe storage; ensure a quick heating;
- provide the best result of the product;
- use wi-fi connection for total control.

MIDA

Midas is the completely automatic vending machine for pre-cooked fresh or frozen meals that, thanks to an integrated powerful microwave, delivers hot food.

Midas is offered in two versions:

- **Mida200T** (15.5" touch screen)
- **Mida300T** (27" Full HD touch screen)

DIMENSIONS

Maximum height	1930 mm
Width	1335 mm *
Depth	1000 mm
Weight	360 kg

* with cutlery dispenser +150 mm

INSULATED CELL

Thanks to the insulated cell, the food is stored safely and the temperature of storage can be adjusted and controlled (also remotely).

TOUCH SCREEN

The selection of the meal is made via a modern touch screen monitor, simple and intuitive to use: just a touch and the product comes out hot and ready.

-----	--------------------

BARCODE READER

Thanks to the barcode reader, the operations of loading are easy and fast.

UPS

To be always aware of the status of the machine, also in case of fall of network, Mida is equipped with a power supply battery that keeps the computer in function and online.

BICOM CLOUD

Bicom has created a cloud through which you can monitor everytime on your laptop, tablet or smartphone, the status of the stock, the sells and the statistic data of your Midas.

HOT AND COLD MEALS

Our vending machines originate with the precise intent to exalt the qualities of the food they offer. Bicom itself has established some collaborations and partnerships with different food producers.

The continuous research for a perfect heating is the aim of the activities of our company.

We support our customers in choosing the right food. Mida has the ability to suit and manage food packed in different kinds of trays of various shapes and size, up to about 100 different products at the same time.

In addition to hot food, Mida can also dispense frozen food, so the customer can pick it up and then heat it in a different place and at another time.

PARTNERS

MENSOFFICE

MensOffice is our new canteen service: fully automatic, hygienically controlled and cheap.

It's especially designed and built for offices, canteens, gyms and all the business communities and places of aggregation.

A simple and convenient system consisting of:

- **Freezer:** an internal warehouse that keeps a controlled temperature of -18 °C and dispenses meals;
- **Totem:** an identification mechanism that manage the withdrawal of products to authorized users;
- A **software** for the management of real-time data;
- **Remote control:** an advanced technology for internet connection to permit telemetry and support in real time.

Purchase and withdrawal:

- The user enters an ID card into a special reader;
- After the identification of the hand user, the touch screen shows the icons of the products stored in the freezer also providing information on ingredients, nutrition facts and other advices such as allergic warnings;
- After reviewing the menu, the user chooses and picks up the selected product.
